OUR WINTER STORAGE CELLAR

This past summer we completely remodeled our winter storage cellar installing a new, concrete roof and automatic controls for proper temperatures at all times. The packing cellar has been scientifically designed for the sole purpose of storing and packing nursery stock. It contains 45,000 square feet of floor space, and is insulated as a refrigerator, providing the proper humidity and ideal conditions for handling and packing trees and plants. Trees and plants must be handled right in order to grow right.

To the Trade —

We are pleased to send you this copy of our new Spring Wholesale Trade List. We carry a general line of stock and you will find our prices reasonable.

All of the stock we offer is thrifty, well-grown and first class in every way. We dig the stock very carefully and grade according to the grades of the American Association of Nurserymen, of which we are a member.

We are equipped to give you real service, and will endeavor to handle your business in such a way as to merit your continued patronage.

Visitors are always welcome. Come and see our stock at any time. We extend to you a cordial invitation.

SPECIMEN EVERGREEN B & B

Sherman's Evergreens have all been transplanted and root pruned. They have also been properly sheared and are grown with plenty of room for development. Our prices are for evergreens securely balled and burlapped. Special prices on carload lots.

All evergreens are sold with the distinct understanding that if they arrive in good condition and are accepted, our responsibility ceases. Due to weather conditions, method of handling and care of trees, we cannot assume responsibility for the successful transplanting of evergreens.

Trucking can be arranged for B & B evergreen orders in quantity. Small orders of B & B Evergreens are packed in baskets or individual containers at packing cost of 60 cents per tree. No charge for loading bulk cars or trucks.

Evergreens are packed and shipped in individual containers as shown at the left, or in baskets—customer's choice.

APPLE TREES

Sherman's Northern-grown fruit trees are widely spaced in the nursery rows to insure growth of straight, sturdy trunks and well-developed root systems. Please note that in all cases, caliper shall govern the size of fruit trees. The heights noted represent the average height of most varieties. Sherman's fruit trees are certified true-to-name through special inspection.

SHERMAN NURSERY FROM THE AIR

Here is an airphoto of the nursery and buildings and a part of the 700 acres used in growing strictly first-class, hardy northern nursery stock. On the extreme right is the large packing cellar containing 45,000 square feet of floor space. It is insulated as a refrigerator and provides ideal conditions for handling and packing of our nursery stock. Trees and plants must be handled right as well as grown right.
